

Slinden Services Ltd

Cast Iron Welding and Engineering

CAT 3512 V12 Block

As we carry out repairs from around the world, it was no surprise to get an enquiry from an Island in the Caribbean!!

The island's Electricity Company were investigating the possibility of repairs to one of their CAT V12 Cylinder Blocks that had cracks in the camshaft area which were in need of repairs.

The cracked block was shipped over to the port of Portsmouth and then transported to our factory in Derbyshire for full stitching work to the defects. The defected area was repaired by way of using our Metal Stitching Process, followed by full machining to correct specifications, Final Testing and repacking ready for its long, long journey back to the island, ready for a full re-build in the plant. *Another economical repair!*

- Free Survey/Quotation
- Full Crack Detection
- Fixed Cost Repairs
- Casting of Parts if Required
- 24 Hour Emergency Service

So as you can see, our services are quite specialised as we continue to increase our worldwide client base. Please contact us if you have any Cast Iron Welding/Metal Stitching enquiries.

*Breathing new life into
damaged cast iron components*
