Cast Iron Welding & Metal Stitching Repairs

St Josephs School

We were approached by a construction company undertaking vital repairs to a primary school to carry out onsite refurbishments to eight cast iron windows needing attention.

This work included travelling to site and de-glazing and stripping the windows back to bare iron, fitting of new opening mechanisms to the opening lights, and repainting with white oxide primer and a top coat of white gloss.

After the glaziers had replaced the glass, we returned to touch up any paintwork to the windows at a later date.

Health and Safety was a big issue as we would be working from scaffolding placed around the school and using noisy tools, so all works were carried out outside of term time, meaning less risk or disruption.

For any Architectural Restorations please call us for a survey/quotation.

- On Site Inspection
- Metal Stitching
- Full Crack Detection
- Recasting if needed
- Painting as Required
- 2 Year Guarantee
