Cast Iron Welding & Metal Stitching Repairs

Antique Benches

We were contacted by a customer regarding welding repairs to two antique cast iron benches – one with the whole end broken away, and the other with old welding needing renewing—and also a pair of bench ends for general refurbishment.

They were brought into our Derbyshire workshop, where they were blasted before being repaired by way of our Lloyd's approved fusion welding procedures for cast iron, followed by grinding up the repairs to the correct profiles and fully crack testing.

The benches were all given a coat of red oxide primer, ready for collection by customer with the option of painting to their own preference.

And, as you can see from the "after" pictures, the detailing has been brought out in the stylised blackberries and scrolled ferns design beautifully – once popular motifs of the Victorian era.

For any Architectural Restorations, please call us for a survey/ quotation.

- Fixed Cost Quotation
- Lloyds Welding Procedures
- Full Crack Detection
- Full Shot Blasting
- Recasting if needed
- Painting if Required
- 2 Year Guarantee
